NATURAL TREASURES IX

INTRODUCTION

We are pleased to present an exceptional collection of natural wonders from around the world.

We continue to be inspired by nature and the ability of these crystals and mineral formations to create intense emotions and reactions, such as those we experience when we admire any form of art.

All of these pieces have been selected for their aesthetic, rarity, condition and quality.

Our mission is to bring the beauty of these works from obscure mines around the world and into people's lives. We hope to awake your curiosity and immerse you in a world of natural treasures.

NO. 845

PERUVIAN PYRITE NATURE'S GEOMETRIC MARVEL

Place of origin: Peru

Height (Including Stand): 18.5cm

Dimensions: H 15cm x W 19.5cm x D 15.5cm

Discover the elegance of this stunning pyrite from Peru, featuring a striking combination of large and small cubes. The piece is adorned with delicate white quartz inclusions, creating a captivating contrast between the golden metallic luster of the pyrite and the pure crystalline quartz.

Originating from Peru's rich mining regions, this pyrite exemplifies the exceptional quality and natural beauty found in the country's minerals. Perfect for collectors, this unique specimen showcases the intricate and geometric splendor of nature.

NO. 851

RADIANT VANADINITE A SYMPHONY OF COLORS

Place of origin: Morocco

Height (Including Stand): 20.5cm

Dimensions: H 18cm x W 10cm x D 8cm

Behold the vibrant beauty of this intense red vanadinite, originating from the mineral-rich regions of Morocco. This striking specimen is adorned with a dazzling array of crystals, showcasing a spectrum of colors from fiery orange to sunny yellow, all harmoniously blending to create a mesmerizing visual experience.

The crystal formations of this vanadinite are truly remarkable, with each facet catching the light and enhancing its vivid hues. Perfect for collectors and enthusiasts, this piece exemplifies the natural artistry and colorful brilliance that can only be found in the world's finest minerals.

NO. 860

BLUSHING BEAUTY PINK CALCITE

Place of origin: China

Height (Including Stand): 12cm

Dimensions: H 11cm x W 13cm x D 10cm

Experience the delicate allure of this exquisite pink calcite, sourced from the renowned mineral deposits of China. This remarkable specimen captivates with its gentle pink hue, complemented by the intricate crystal formations that reflect light in a soft, mesmerizing manner.

Ideal for collectors and enthusiasts, this pink calcite not only showcases the natural beauty of Chinese minerals but also serves as a testament to the earth's ability to create such stunning works of art. Each crystal structure within the piece tells a unique story of geological wonder, making it a true treasure for any collection.

NO. 863

ETHEREAL ELEGANCE RARE SELENITE

Place of origin: Mexico

Height (Including Stand): 36.5cm

Dimensions: H 32.5cm x W 25cm x D 16cm

Marvel at the breathtaking beauty of this rare selenite specimen from Mexico, renowned for its unique and intricate formations. The crystal structure of this selenite is truly extraordinary, with clear, pristine sheets that capture and reflect light in a mesmerizing manner, creating an almost ethereal glow.

Originating from the rich mineral deposits of Mexico, this selenite stands out not only for its clarity and purity but also for its rarity and special shape. Collectors and enthusiasts will appreciate the natural artistry and geological wonder embodied in this magnificent piece, making it a centerpiece of any mineral collection.

NO. 864

EXQUISITE AQUAMARINE WITH MUSCOVITE AND QUARTZ CRYSTAL

Place of origin: Pakistan

Height (Including Stand): 18cm

Dimensions: H 16cm x W 20cm x D 15.5cm

This captivating piece features a striking aquamarine crystal, renowned for its serene blue hues, set elegantly amidst a matrix of shimmering muscovite. The muscovite, with its delicate, layered appearance, provides a stunning contrast to the aquamarine, enhancing the overall visual appeal of the specimen. The combination of the vibrant blue aquamarine and the silvery sheen of the muscovite creates a mesmerizing display, making this piece a true collector's gem.

Adding to the allure is a transparent quartz crystal, subtly embedded within the muscovite matrix. The quartz crystal's clarity and pristine structure complement the aquamarine, creating a harmonious balance of colors and textures. This piece, sourced from the mineral-rich regions of Pakistan, exemplifies the natural beauty and geological wonders of the area. It is a perfect addition to any collection, showcasing the elegance and diversity of Earth's mineral treasures.

NO. 866

DUAL AQUAMARINE CRYSTALS ON MUSCOVITE MATRIX

Place of origin: Pakistan

Height (Including Stand): 13cm

Dimensions: H 15cm x W 19.5cm x D 15.5cm

This remarkable specimen showcases two beautifully formed aquamarine crystals, each exhibiting a stunning blue hue that is characteristic of this prized gemstone. The aquamarine crystals are elegantly perched on a bed of muscovite, whose silvery, layered sheets add a unique texture and brilliance to the overall piece. The interplay of the serene blue aquamarine with the shimmering muscovite creates a visual masterpiece, highlighting the natural beauty of these minerals.

Originating from the mineral-rich regions of Pakistan, this piece exemplifies the exceptional quality and aesthetic appeal typical of minerals from this area. The aquamarine crystals, with their clarity and color, stand out against the backdrop of the muscovite matrix, making this specimen a captivating addition to any mineral collection. The harmonious combination of aquamarine and muscovite not only enhances the visual allure but also underscores the geological marvels of Pakistan.

NO. 873

GOLDEN SPLENDOR YELLOW CALCITE WITH GALENA

Place of origin: USA

Height (Including Stand): 15cm

Dimensions: H 12cm x W 27cm x D 17cm

Feast your eyes on this remarkable specimen featuring vibrant yellow calcite crystals elegantly perched on a natural matrix, originating from the rich mineral deposits of the USA. The striking golden hues of the calcite create a stunning visual contrast against the earthy tones of the matrix, highlighting the intricate beauty of these natural formations.

At the heart of this piece lies a central galena cube, adding a touch of metallic luster and geometric intrigue to the composition. This unique combination of minerals not only showcases the geological diversity of the USA but also makes it a prized addition for collectors and enthusiasts alike. Each element of this specimen tells a story of natural wonder and artistic brilliance.

NO. 876

MAJESTIC LAPIS LAZULI DEEP BLUE TREASURE

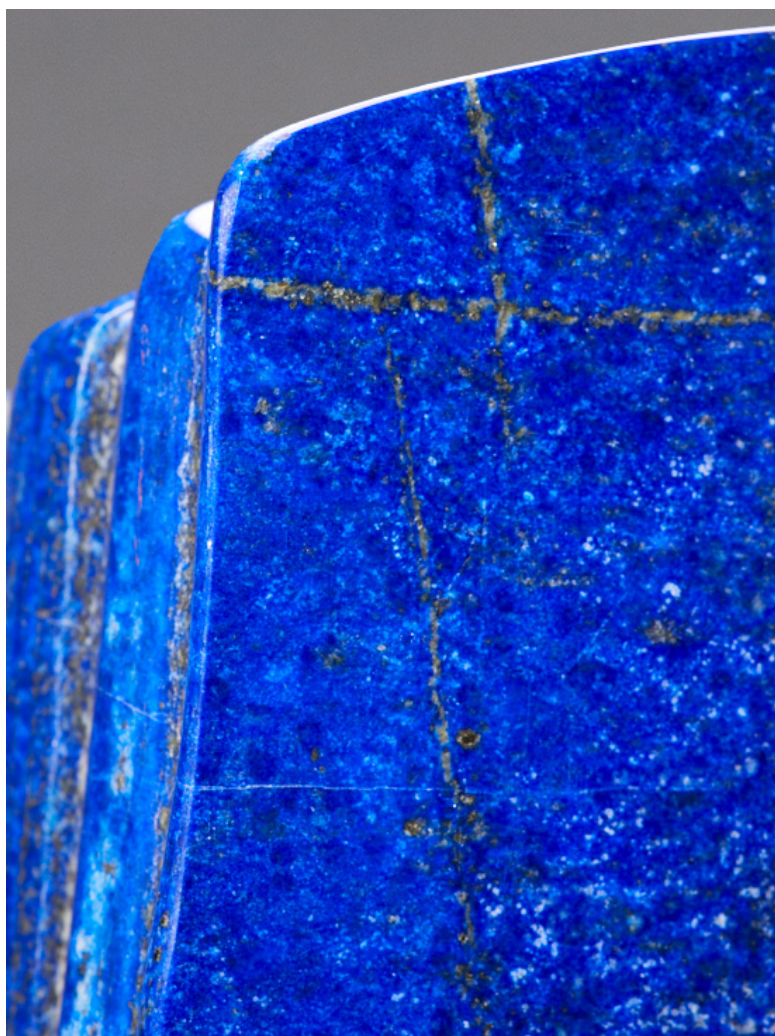

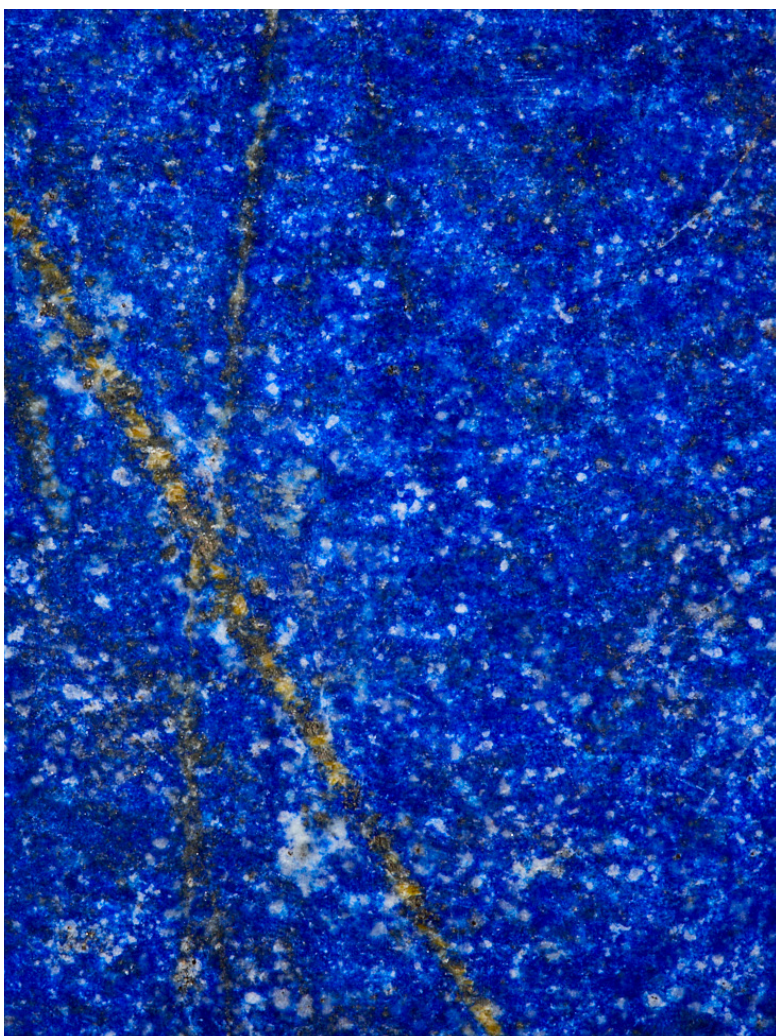

Place of origin: Afghanistan

Height (Including Stand): 45.5cm

Dimensions: H 39cm x W 24.5cm x D 13cm

Behold the striking beauty of this magnificent lapis lazuli from Afghanistan, renowned for its intense blue hue. This extraordinary piece showcases the rich, deep color that lapis lazuli is celebrated for, with subtle gold flecks adding a touch of elegance and natural artistry.

Originating from the historic mines of Afghanistan, this lapis lazuli is a testament to the region's geological heritage. Ideal for collectors and admirers of fine minerals, this piece stands as a remarkable example of nature's ability to create profound and captivating beauty. Its commanding presence makes it a stunning addition to any collection.

NO. 878

VIBRANT FLUORITE A RADIANT GEM WITH GALENA

Place of origin: Tennessee - USA

Height (Including Stand): 24cm

Dimensions: H 22cm x W 15.5cm x D 11cm

Marvel at the striking beauty of this vibrant fluorite specimen from the USA, adorned with stunning cubic formations. The deep purple hue of the fluorite crystals contrasts beautifully with the metallic sheen of the galena cubes, creating a visually captivating display that showcases nature's artistic prowess.

Originating from the rich mineral deposits of the United States, this fluorite with galena is a testament to the diverse and unique geological formations found in the region. Ideal for collectors and enthusiasts, this exceptional piece highlights the intricate and harmonious blend of color and texture, making it a prized addition to any mineral collection.

NO. 879

SPECTRAL SYMPHONY MULTI-COLORED FLUORITE

Place of origin: Illinois - USA

Height (Including Stand): 32cm

Dimensions: H 28cm x W 26cm x D 13cm

Behold the dazzling beauty of this multi-colored fluorite specimen from the USA, featuring a rich palette of violet hues interspersed with transparent areas and edges adorned with a stunning mix of green, purple, and pink. The sharp, well-defined cubic formations of the fluorite capture and reflect light, creating a mesmerizing visual display that highlights the crystal's depth and complexity.

This exceptional piece originates from the mineral-rich regions of the United States, renowned for producing some of the most spectacular fluorite specimens in the world. The varied coloration in this specimen not only adds to its visual appeal but also signifies the unique mineral conditions under which it formed. Ideal for collectors and connoisseurs of fine minerals, this fluorite is a testament to nature's ability to create art in the most unexpected forms.

NO. 880

RADIANT RUTILATED QUARTZ SPHERE A BRAZILIAN MARVEL

Place of origin: Brazil

Height (Including Stand): 13cm

Dimensions: Diameter 11.5cm

Gaze into the mesmerizing depths of this exquisite transparent quartz sphere, showcasing an intricate display of red and brown rutile needles within. This captivating piece hails from the renowned mineral deposits of Brazil, known for producing some of the finest quartz specimens in the world.

The clarity of the quartz combined with the vibrant rutile inclusions creates a stunning visual spectacle, making this sphere a true masterpiece of nature. Ideal for collectors and enthusiasts, this rutilated quartz sphere is not only a testament to the geological wonders of Brazil but also a perfect example of the beauty and complexity found in natural minerals.

NO. 881

SPECTACULAR CITRINE POLISHED PERFECTION

Place of origin: Brazil

Height (Including Stand): 20cm

Dimensions: H 17cm x W 13.5cm x D 10cm

Feast your eyes on this breathtaking polished citrine from Brazil, a true marvel of natural artistry. This stunning specimen boasts remarkable transparency, allowing the rich brownish hues to shine through, beautifully accented by striking red inclusions within.

Hailing from the renowned mineral-rich regions of Brazil, this citrine exemplifies the exceptional quality and beauty found in the country's gemstones. The harmonious blend of colors and the flawless polish make this piece a standout addition to any collection, showcasing the captivating interplay of transparency and vivid inclusions that define its unique charm.

NO. 889

ETHEREAL FLUORITE BLUE BARITE MATRIX WITH RED ACCENTS

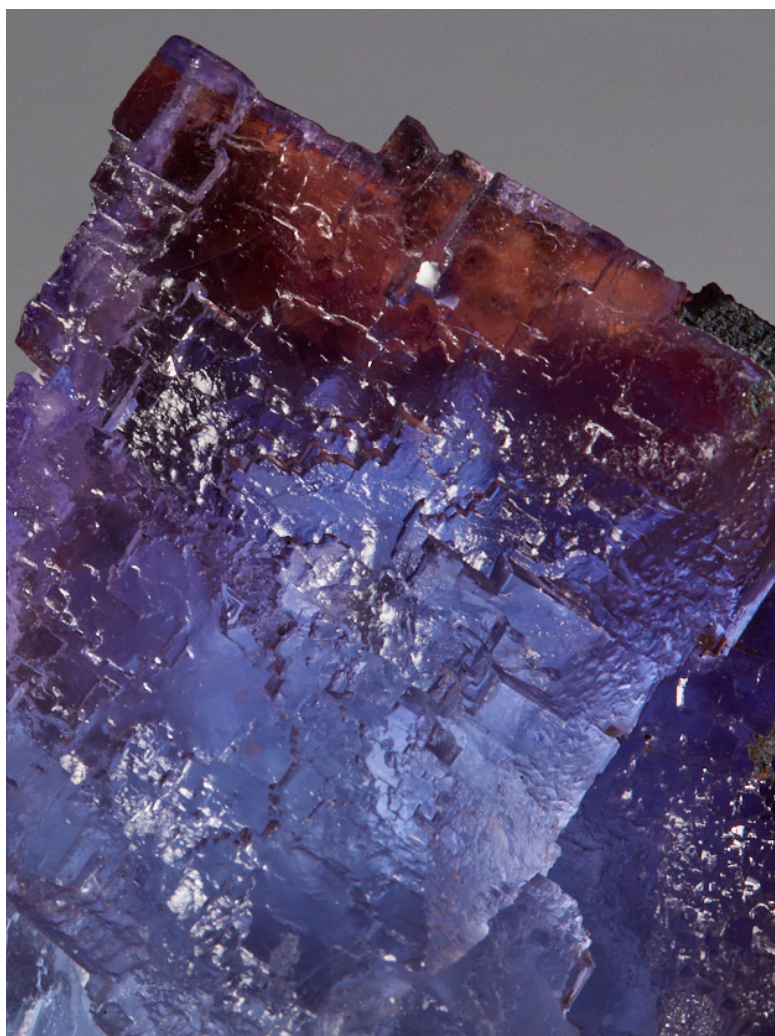

Place of origin: Taourirt, Debdou, Morocco

Height (Including Stand): 11cm

Dimensions: H 10cm x W 8.5cm x D 8cm

Immerse yourself in the captivating allure of this exquisite fluorite specimen from Taourirt, Debdou, Morocco. This stunning piece features translucent blue fluorite crystals elegantly set in a matrix of barite, with delicate red accents adorning the top, creating a mesmerizing blend of colors and textures.

Renowned for its exceptional clarity and vibrant hues, this Moroccan fluorite showcases the natural beauty and geological richness of the region. Ideal for collectors and enthusiasts, this specimen is a testament to the intricate artistry and vibrant diversity found within the mineral kingdom, making it a prized addition to any collection.

NO. 890

VIOLET FLUORITE ELEGANCE PAIRED WITH WHITE QUARTZ

Place of origin: Berbes, Ribadesella, Spain

Height (Including Stand): 15cm

Dimensions: H 13cm x W 9cm x D 7.5cm

Admire the striking beauty of this violet fluorite specimen, hailing from the renowned mineral region of Berbes, Ribadesella, Spain. The deep purple fluorite cubes are exquisitely perched on a bed of pristine white quartz, creating a stunning contrast that highlights the vibrant color and clarity of the fluorite.

This exceptional piece showcases the natural harmony and geological richness of Spain's mineral deposits. Ideal for collectors and enthusiasts, this fluorite and quartz combination is a testament to the intricate beauty and unique charm found in nature's finest creations, making it a standout addition to any mineral collection.

NO. 978

MAJESTIC SMOKY QUARTZ PRISTINE CRYSTAL

Place of origin: Pakistan

Height (Including Stand): 28.5cm

Dimensions: H 26cm x W 11cm x D 14.5cm

Behold the grandeur of this stunning smoky quartz specimen from Pakistan, featuring a tall, well-formed crystal with deep, rich tones. The natural beauty of the quartz is enhanced by its remarkable clarity and the intricate patterns that run through the length of the crystal, making it a truly captivating piece.

Originating from the mineral-rich regions of Pakistan, this smoky quartz stands as a testament to the exceptional quality and unique geological formations found in the area. Ideal for collectors and enthusiasts, this specimen is a striking example of nature's ability to create profound and awe-inspiring works of art.

NO. 979

GARNET GLORY EXQUISITE CRYSTALS IN MATRIX

Place of origin: Pakistan

Height (Including Stand): 12.5cm

Dimensions: H 10.5cm x W 7.5cm x D 7cm

Marvel at the striking elegance of this garnet specimen from Pakistan, featuring deep red garnet crystals beautifully embedded in a pristine white matrix. The rich, lustrous garnets contrast dramatically with the pale background, creating a visually stunning display that captures the eye.

Hailing from the mineral-rich regions of Pakistan, this piece exemplifies the natural beauty and geological diversity of the area. Ideal for collectors and enthusiasts, this garnet in matrix specimen is a testament to nature's ability to create artful and captivating mineral formations, making it a standout addition to any collection.

NO. 980

BRILLIANT DOUBLE HERKIMER DIAMONDS PRISTINE GEMS

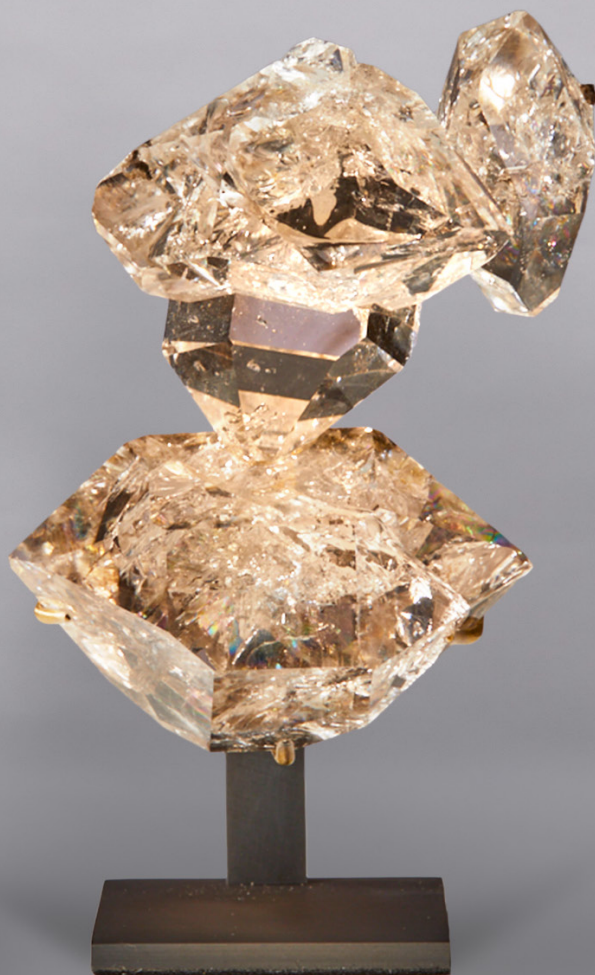

Place of origin: USA

Height (Including Stand): 10cm

Dimensions: H 8cm x W 5cm x D 3cm

Discover the exquisite beauty of these double Herkimer diamonds, a true marvel from the mineral-rich regions of the USA. Known for their exceptional clarity and natural brilliance, these Herkimer diamonds exhibit a stunning, multifaceted sparkle that captures and reflects light in a mesmerizing dance.

These unique quartz crystals, often referred to as “diamonds” due to their remarkable clarity and luster, are a prized find for collectors and enthusiasts. The double formation adds a layer of intrigue and beauty, making this specimen a standout addition to any collection, showcasing the geological wonders of the United States.

NO. 981

ENCHANTING HEMIMORPHITE BLUE STONE WONDER

Place of origin: China

Height (Including Stand): 20cm

Dimensions: H 17.5cm x W 13cm x D 9.5cm

Immerse yourself in the captivating hues of this exceptional hemimorphite specimen from China. This unique piece showcases a mesmerizing gradient of colors, transitioning smoothly from vibrant green to deep turquoise, creating a visual spectacle that is both soothing and striking.

Renowned for its stunning color and intricate formations, this hemimorphite is a testament to the geological wonders found in China. Perfect for collectors and enthusiasts, this blue stone specimen embodies the natural beauty and artistic splendor that make minerals such a fascinating addition to any collection.

NO. 982

PERUVIAN PYRITE NATURE'S GEOMETRIC MARVEL

Place of origin: Peru

Height (Including Stand): 15cm

Dimensions: H 13cm x W 10.5cm x D 8.5cm

Behold the stunning brilliance of this triangular pyrite specimen from Peru, showcasing a remarkable geometric formation that captures the eye. The metallic luster and sharp, well-defined edges of the pyrite crystals create a dazzling display of natural artistry.

Originating from the rich mineral deposits of Peru, this pyrite is a testament to the region's geological wealth. Ideal for collectors and enthusiasts, this unique piece highlights the intricate and fascinating patterns that only nature can produce, making it a standout addition to any mineral collection.
